### Disclaimer

Off road activities can be hazardous and could lead to injury, dismemberment, paralysis and death. No warranty of representation is made as to the products ability to protect the user from any injury or death. The user assumes that risk. The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

Parts included
Shifter knob
5/16 -18 threaded insert
M8 x 1.25 threaded insert

- Read and understand these instructions before installing product
- Do not use product if there are any signs of damage
- Installation May Damage Powder Coat

**Pre-Installation-** Refer to DragonFire Racing website to ensure that you have the latest version of instructions.

**Step 1:** Use a wrench to loosen the lock nut and unscrew the old shifter knob. (Figure A).

**Step 2:** Clean threads of shaft and apply one drop of Blue lock tight. Thread the Shifter knob insert in place and then thread on the new shifter knob until tight. (Figure B). The shifter knob insert should have a small patch of pre-installed lock tight between it and the shifter knob.

**This Completes the shifter knob Installation.**

**Note:** Make sure to use the right insert on your UTV. Take care to not cross thread the insert.

Inserts provided:

5/16 -18 thread - All Polaris models.

M8 x 1.25 - Can-Am models.
